

FIBERGLASS

- Made in the USA since 1968
- Problem solving tire – holds more weight than traditional cushion press-ons
- Fiberglass reinforced compound unique in tire industry
- Excellent traction pattern
- Wider tires gives more life and stability
- Available in all common sizes

FiberGlass

BENEFITS

- Fiberglass reinforced tires provide higher durability and tread life, and help reduce downtime and keep material handling vehicles running longer with more efficiency.
- Grey non-marking Fiberglass tires consistently outrun traditional white non-marking tires. Some users claim they outrun nonmarking tires by as much as 50%!

COMPOUND

- Our unique patented compound plus our superior components and strict quality control make our tires different from all other cushion press-on tires.

PRODUCT

- Manufactured in Houston, Texas since 1968, the Fiberglass reinforced compound wears longer, and works harder than traditional rubber tires.
- The Roadrunner Fiberglass reinforced tires continue to be the go-to problem solving cushion press-on tire.
