

ZINC PROBLEMS?

The Roadrunner Fiberglass cushion press on tire, made in Houston Texas for over 45 years - once again at the forefront of technology and innovation - with less than **0.9% Zinc Oxide** in our tires!

Our unique compound of Fiberglass impregnated tires is unique in the world, with customers all over the world from OEM's and manufacturers to special applications and everyday forklifts! We make over 80 sizes right here in the USA!

With a durometer of 72, the Fiberglass non-marking tire is harder than most standard rubber tires while still providing the smooth ride of a traditional rubber tire - keeping operators happy! It's 0.9% Zinc content will keep the environment happy too!
